

# INFINITY

Made to last a lifetime

ALU - CLAD  
BRONZE - CLAD

*Proudly Made in Italy*

ONE WINDOW....

...ENDLESS COMBINATIONS

## ALU CLAD | BRONZE CLAD

The new Infinity line is the best timber aluminum windows on the market. It consists in an high performance windows mix between wood, lamellar or solid, covered by aluminum or bronze.

This kind of windows is the practical and aesthetical answer to the customers who desire the beauty and the elegance of the wood, without renouncing to the resistance and the modern style of aluminum or bronze.

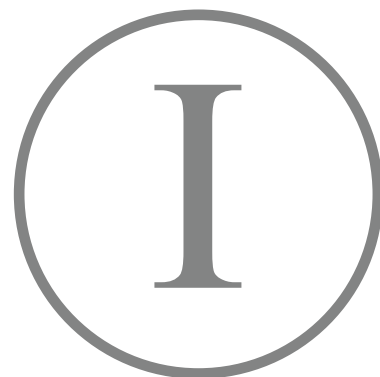

The attention to design (modern, contemporary or rustic), the details of every configuration of this window are the natural evolution of our timber window BERG68, offering in more than a huge quantity of coverings.

Our windows are also equipped with an internal removable glazing bead that allows to choose between a standard double glazing or a special triple glazing that guarantee the possibility to reach the Passive house standards.

ONE WINDOW...ENDLESS COMBINATIONS...

# BERG68 FLAT

Essential, clean, angular. Three characteristics that describe the features of this new system. It derives from the classic alu-clad system, but it offers the most squared lines of the Infinity collection. Moreover, the pronounced overhangs provide a feeling of depth which emphasizes its contemporary character.

FLAT

# BERG68 RUSTIK

Old fashioned shape with the performances of the latest generation. This system meets the needs of those projects where you need to maintain the historical context, with its decorated and elaborated lines. It is the most peculiar of our collection, the whole line and the processes are designed in order to make the window "rich and sumptuous".

# RUSTIK

# BERG68 LIGHT

This product is the perfect solution for the current modern market demand in terms of design and performances. The linear and simple aluminum profile makes the window attractive and winning; moreover, with this cover there's the chance to allocate glazing with a big thickness to upgrade the required thermal and acoustic features.

G  
L

# BERG68 PLUS

With a linear and essential configuration, thanks to the sloping profile that enhances the sense of depth, the Plus model is one of the best arrangement for those who search a window with high thermal and acoustic performances.

PLUS

## BERG68 PLUS 2

This kind of cover is the natural evolution of the Plus model, the lines remain quite the same with a little modify on the upper part that is flat according to the new building construction rules.

Also this model can be equipped with a standard double glazing or a triple glazing that guarantee higher performances in terms of thermal and acoustic insulation.

PLUS 2

# BERG68 SOFT

Modern and classic features are perfectly harmonized in this type of cover with a curved and classical style profile.

It is particularly suited couple with our soft glazing bead equipped with BERG68 model.

SOFT  
S

# BERG68 QUADRA

Particularly modern with an edge clean design, the Quadra model combines perfectly the construction simplicity of a modern cover with a strong personality extremely suitable both for modern and contemporary contexts.

QUADRA

# BERG68 ONE

The most classic and wide-used piece of all our Infinity collection, characterized by simple, linear and rounded lines.

Suitable for all situations from the classic construction or refurbishment to the modern or contemporary buildings.

ONE

# BERG68 SLIDE

The Infinity range include a particular cover also for sliding doors, available in all the range of colours and finishes.

This solution it is available for both our sliding doors model Panoramico and Vision.

SLIDE

## BERG68 SUN

The configuration of Sun model allows to insert venetian blind in the space between the aluminum profile and the double glazing, realizing the best solution in terms of performances and comfort.

Indeed, the external glazing (5 mm) doesn't influence the thermal value of the window, actually offers the possibility to inspect and clean the blind thanks to the release mechanism.

S  
SUN

# BERG68 THERMO

Technology, research and design...Thanks to the innovative materials the Thermo model protecting covers allow the best heat possible insulation; the aluminum isn't in contact with the wood because of the high-density insulating layer which guarantees optimum abatement levels and exceptional mechanical characteristics. These covers are suitable in cold climate and, with a few adjustments, for Passive house.

# THERMO

## BERG68 BRASS

The Brass model is the perfect fusion between a long-known material and the modern technology. This kind of cover is also available in classic finishes obtained by natural passivation, brass copper, ancient brass, satinized and shiny brass; a wide range of finishes which remind the handsome, warm and refined design of ancient sculptures and old architecture.
